MUBA HACK 2026

ABOUT MUBA

MUBA (Malaysia University Blockchain Association) is a student-led organization dedicated to fostering blockchain innovation, education, and community building. As the organizing body of MUBA Hacks, we bring together developers, designers, and visionaries to build the decentralized future. Our mission is to empower the next generation of Web3 builders through hands-on experience, mentorship from industry leaders, and collaboration across blockchain ecosystems.

SUI TRACK REVEAL

01 — PAYMENTS & STABLECOINS

Build the future of money movement on Sui: payments, payouts, remittance, wallets, payroll, escrow and treasury tools.

02 — AI × SUI

Build AI applications using Sui for ownership, identity, payments or on-chain execution: agents, assistants, games and automation.

MUBA HACKS 2026

SUI TRACK 01 – PAYMENTS & STABLECOINS

BUILD THE FUTURE OF MONEY MOVEMENT ON SUI

Create products that simplify sending, receiving, managing or automating money with stablecoins.

IDEAS

Campus payments • creator payouts & tipping • group expenses • merchant checkout/POS • remittance • payroll • stablecoin wallets • treasury • escrow

LOOKING FOR

Real workflow • fast intuitive UX • effective Sui/stablecoin use • working live demo

HELPFUL SUI FEATURES

Sponsored transactions • zkLogin • Programmable Transaction Blocks

JUDGING

Product UX • real-world readiness • technical implementation • presentation

MUBA HACKS 2026

SUI TRACK 01 – PRIZE POOL

SUI TRACK 02 – AI × SUI

BUILD AI APPLICATIONS POWERED BY SUI

Use Sui for ownership, identity, payments or on-chain execution.

IDEAS

On-chain-wallet agents • transaction-executing assistants • workflow automation • agent-to-agent commerce • AI marketplaces • personal copilots with digital ownership

LOOKING FOR

AI solves a real problem • Sui is integral, not an add-on • thoughtful UX • working live demo

HELPFUL SUI FEATURES

zkLogin • Walrus/MemWal • Programmable Transaction Blocks • sponsored transactions

JUDGING

Product UX • real-world readiness • technical implementation • presentation

01 — BEST PRODUCT BUILT ON THE THETANUTS SDK

Build a real working product on the decentralized options protocol on Base.

PRIZE: 1,000 USDC

02 — AI × OPTIONS

Build an AI agent that executes a live on-chain options trade through OptionBook or OptionFactory.

PRIZE: 1,000 USDC

MUBA HACKS 2026

THETANUTS TRACK 01 – SDK PRODUCT

BEST PRODUCT BUILT ON THE THETANUTS SDK — 1,000 USDC

Build any working product on the Thetanuts SDK, a decentralized options protocol on Base.

POSSIBILITIES

Structured products • vaults • consumer trading apps • options-powered lending • analytics • entirely new options use cases

THE BAR

Deliver a real working product that uses on-chain options meaningfully.
